AT PLAY NATURALLY

Transform your play areas with Natural Thatch, Bamboo and Brushwood and Fale & Tropical Playhouses

Brustics Fencing

Eucalyptus

Light yet strong, Eucalypt provides a natural fence and is a popular choice for playgrounds. Brustics Eucalypt fence panels provide traffic direction and yet children are also able to look through them, creating a sense of space and allowing interaction, even if they are in different areas of the centre. They also allow teachers to observe children throughout the playground.

Eucalypt

Eucalypt No Gap 1.8m only

RAIL SUPPORT

NO RAIL

Eucalypt fencing has 2 galvanised steel rods top and bottom threaded through the staves which are then rope bound. It is recommended the Eucalypt is installed either by attaching to posts at 1.1m centres or screwed to a frame with top and bottom rails.

Brushwood

Brustics Brushwood panels are used to provide privacy and screen unsightly areas. Brushwood panels are less susceptible to graffiti as they do not carry spray paint well.

BORDER STYLE

A continuous Brushwood line - panels are placed along the front of the posts and stapled to a rail. The frame will be seen on one side. To prevent sag the panels sit on the top edge of a 150 x 50mm plinth.

STANDARD STYLE

The panels are placed between the posts and framed with 25 x 25mm beading. It looks the same from both sides. To prevent sag the panels sit on the top edge of a 150 x 50mm plinth.

Bamboo

Installed outside, the 'natural' bamboo weathers to a silver grey similar to timber, the 'smoked' will weather to a mushroom colour after 3-6 months. Once weathered the bamboo becomes more porous, enabling varnish or stain to penetrate, something which cannot be done when new. We recommend the smoked bamboo is stained after 3-6 months and the natural bamboo after 12-18 months.

Jati Natural 30-50mm

Jati Smoked 30-50mm

BORDER STYLE

The panels are placed between the posts and framed with 25 x 25mm beading. It looks the same from both sides. To prevent sag the panels sit on the top edge of a 150 x 50mm plinth.

STANDARD STYLE

A continuous Bamboo line - panels are placed along the front of the posts and stapled to a rail. The frame will be seen on one side. To prevent sag the panels sit on the top edge of a 150 x 50mm plinth.

Fale & Tropical Playhouses

ROSPA approved Tropical Playhouses: - Either 2.6m or 3.2m diameter with deck

ROSPA Approved Kitset includes: Roof structure available with Natural or Synthetic thatch options.

Floor platform (Height 900mm or 1200mm) and all fixings.

Diameter measured to the eaves. Pole position/platform diameter is 2.25m and 2.85m respectively.

Excludes: Installation. Call us for a quote if you are in the Auckland area.

Excludes: Slide, grab rails and stairs (Please advise your requirements and we can provide a costing including these components - slide approx \$900.00 + GST. Poles 2.6m (6) 3.2m (8) (approximately \$90.00 + GST each). Freight is an additional cost TBC in quotation.

BRUSTICS KITSETS

Cabanas, Fale roofs, and Umbrellas - we offer a range of kitsets designed to provide the best result if DIY install is preferred. The thatch is easily installed on a gable roof, however requires a special roof design to install on hip roofs.

If you don't know the difference between the two, please ask. Please note; fees apply to design roof structures and or re-design or rectify installations where we have not designed and or installed previously. See Brustics price list for sizes.
